

Powering Your Home with the Sun

An Introduction to Residential Solar Energy Systems

Recently the **Village of Deer Park** was awarded the **SolSMART SILVER** designation from the US Dept of Energy. This means the Village has streamlined the process of acquiring a Solar Energy System and announces Deer Park is “open for Solar business”. If you have ever wondered if solar is right for you and what the process is to acquire this affordable and clean technology then please join IL Solar Energy Association (ISEA) Solar Ambassador **Peter Gorr** for a nontechnical presentation on the basics of residential solar, the steps to own, the current incentives available, and the experience of living with solar. Mr. Gorr has installed systems on his last 2 homes including his current Deer Park residence. He will use his experiences, actual data, and results to illustrate the many benefits this technology offers homeowners.

November 19, 7:00 PM – Free and open to the public

**Location: Vehe Barn, Village of Deer Park
23680 W. Cuba Rd, Deer Park**

**Contacts: Peter Gorr, 847-767-0993, peter.gorr@illinoissolar.org
